Designing and implementing the internal network infrastructure of Petrofarin Company	2022
Designing and implementing the internal network infrastructure of Ivek Company	2024

### About Me

Information Technology and Security Manager, Network and Infrastructure Engineer, also interested in working in the field of security, talented and interested in progress, with skills in designing medium and advanced network infrastructure and familiar with the principles of setting up internal networks based on HPE, Microsoft, Cisco, MikroTik for organizations. I also have personal skills in designing and implementing internal network infrastructure and am familiar with Cisco's multi-layered architecture. I also have experience working in difficult, critical, and stressful environments, including broadcasting and live television broadcasting. I am also interested in challenges and always looking to learn.
